

# Let's Talk About iPad Fees!!!

If you still owe fees from last year for a broken screen, missing charger or case damage, those fees are still there. **They did not go away!**

Also if your parents chose not to pay the \$25 Technology fee at registration this year, it is highly recommended.

# How does the \$25 fee work?

## Students Grades 6-8 who **PAY** the Technology Fee:

- will use devices only at school and are not allowed to take devices home
- pay an additional \$25 for the first accidental damage repair, \$50 for the second accidental damage repair and full cost of repair for all subsequent accidental damage repairs during the academic year
- pay an additional \$25 for device replacement due to theft (requires police report)
- pay full repair for all damage caused by neglect or abuse
- pay full replacement cost for loss due to neglect

## Students Grades 6-8 who **DO NOT PAY** the Technology Fee:

- pay full repair costs for all accidental damage
- pay full replacement cost for loss due to theft
- pay full repair for all damage caused by neglect or abuse
- pay full replacement cost for loss due to neglect

# What are the typical fees for repair if a student chooses NOT to pay the Technology Fee?

Like a textbook, responsibility for the loss or damage of a device is the responsibility of the student/parent. If the parent/guardian has not paid the \$25 Technology Fee, damages are estimated at:

- Broken Screen - up to \$150
- Power adapter and cord \$35
- Case \$25
- Re-Synchronization due to violation of the Acceptable Use Policy \$15
- Replacement of the device could be close to \$500
